BURGIJA SDS+

Opis: volfram karbid; SDS+ burgije napravljene od visokokvalitetne legure čelika sa četvorreznim vrhom od volframovog karbida, garantuje performanse čak i na najtvrdem betonu; 4 tačke lomljenja; pretvaraju materijal u sitan prah; centrirajući vrh obezbeđuje maks. preciznost; više karbida dovodi do veće izdržljivosti vrha i duži radni vek; deblja spirala na kraju za veću stabilnost i manje šanse za lom burgije; uzana spirala za ekstrakciju prašine, veću brzinu i manje trenje.

Pogodan za materijal: beton, kamen, cigla, betonski blok.
